ROBERT A. BRIANT, JR.
Chairman

March 29, 2016

URGENT!!!! URGENT!!!! URGENT!!!!

CALL FOR ACTION TO PLEASE CONTACT SENATORS AND THEIR STAFF

As a follow-up to our Coalition conference call, here is the information for reaching out to Members on the Senate Appropriations Committee and the House Appropriations Committee. We did a crosswalk between Coalition members and Appropriations Committee Members. Please use the list below to send the suggested email to the Senator's/House Representative's appropriations staffer. Those Chapters that do not have representation on either appropriations committee, please feel free to send the same letter to your Congressional Delegation.

Senate Letter Email

“On behalf of the **(enter YOUR chapter name – for example, Utility and Transportation Contractors Association of New Jersey)**, a member of the Clean Water Construction Coalition, an organization with 30 chapters in 23 states and the District of Columbia, employing over 11,000 people and committed to securing much-needed funding for the Nation’s Clean Water and Safe Drinking Water State Revolving Funds, I am writing to respectfully request that the Senator support funding amounts in the FY17 Interior, Environment, and Related Agencies Appropriations bill for the Clean Water SRF and for the Safe Drinking Water SRF at NOT LESS THAN \$2,000,000,000 for each program. The Clean Water and the Drinking Water SRF’s remain critical tools for pollution prevention, economic growth, and public health. According to the American Society of Civil Engineers 2013 Report Card for America’s Infrastructure, our nation’s systems of drinking water and wastewater infrastructure each received a “D” rating. Through SRFs investment programs, states provide loans and other financial assistance to local communities or utilities to support upgrades and replacements of water distribution pipelines, treatment plants, sewer lines, storm water conveyances, and other similar infrastructure. This funding is critical as it helps communities maintain safe and effective water infrastructure and affords states the flexibility to fund their highest-priorities. The Senator’s support is critical. Thank you.”
